Right to Life - LIFESPAN

Life is like an arch. If you discard one segment as worthless, the span collapses — the value of all life brought low.

POSITION STATEMENT OF Right to Life – LIFESPAN and MICHIGAN NURSES FOR LIFE ON THE ISSUE OF EMBRYONIC STEM CELL RESEARCH AND HUMAN CLONING

Right to Life – LIFESPAN and Michigan Nurses for Life encourages research on legal, ethical, non-destructive adult stem cell therapies and supports a ban on all human cloning for reproductive purposes as well as cloning of human embryos that are created and then killed for research.

Right to Life – LIFESPAN and Michigan Nurses for Life applauds the work of researchers who use life giving, life affirming adult stem cells and whose work has resulted in the treatment and/or cures of over 70 human conditions or diseases.

Right to Life – LIFESPAN and Michigan Nurses for Life opposes the use of human embryos, their stem cells, or any other part of their substance, as raw material for research purposes, no matter how they are obtained or their level or stage of development. To date, such research has resulted in no treatments or cures for any human condition or disease and has resulted in the deaths of countless human lives in their embryonic stage.
